

HOW DO YOUR CLOSURES STACK UP?

Here are 5 ways
EcoStack[®] closures
deliver *more* of
what matters.

1 **More closures per pack**
EcoStack closures are nested to increase your pack count up to 87%. This saves valuable warehouse space with fewer boxes to empty during production.

2 **More economical**
The stacked design reduces shipping costs and greenhouse gases by giving you more closures per delivery.

3 **More ecological**
EcoStack closures are manufactured using less resin while still maintaining quality, making these closures a more ecologically-responsible choice.

4 **More consistent quality**
EcoStack closures are stacked to reduce warpage. This helps increase line speeds for better production efficiencies.

5 **More confidence**
We have over a century of expertise in high quality closures. EcoStack closures are exclusively made by PHOENIX in SQF certified facilities located in the U.S.

EcoStack[®]

MORE CLOSURES | LESS PLASTIC | SMARTER PACKAGING

PHOENIX[™]

EcoStack® Closures

FOCUSED ON SUSTAINABILITY

- Maximized pack counts means more efficient shipping and less greenhouse gas emissions
- Minimized resin means less plastic waste while still maintaining cap integrity

CUSTOMIZATION OPTIONS

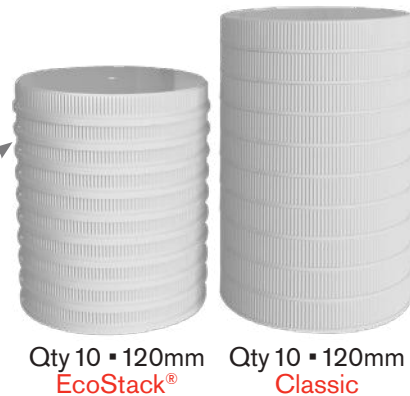

- Match your brand colors
- Embossing with your custom message
- Offset printing is available in up to three colors for shallow-skirted closures.

PRIMARY MARKETS Food, Food Service, Home Care, Nutraceuticals, and Powdered Drinks

KEY FACT
Up to 87% more closures in every pack
PHOENIX EcoStack® closures allow for many more caps per pack and truckload versus Classic CT Closures.
